

Specializing in Retail Control Systems Since 1967

DISCOVER **SMS**: STCR'S **STORE MANAGEMENT SYSTEM**

OUR CUSTOMER IS THE INDEPENDENT RETAILER. THEY REQUIRE A HIGH LEVEL OF SERVICE TO SUPPORT THEIR SYSTEMS. STCR RECOGNIZES THAT INDEPENDENT RETAILERS DO NOT ALWAYS HAVE THE RESOURCES AND/OR TIME TO SUPPORT THEIR TECHNOLOGY. STCR IS IN BUSINESS TO DO JUST THAT.

We offer the most comprehensive and cost effective retail store systems available in the industry. As a system integrator, STCR partners with the IBM Corporation and others to provide our clients with the information they need to gain a competitive edge in their marketplace, while maintaining the highest level of customer service and satisfaction possible. Nothing less is acceptable.

SMS is a complete "Suite" of applications designed for the retail industry. From the Point of Sale system all the way up to central host and warehouse management, SMS is the perfect tool to **Buy, Sell and Manage**.

- Single and multi-store environments
- Complete turnkey solutions
- Operates on the stable and reliable IBM platform

ALL IN ONE...

FULL FEATURED POINT-OF-SALE

The SMS Point-of-Sale system offers superior data handling capabilities. Features: touch screen or keyboard, debit/credit and gas pump interface, advanced customer loyalty features, support for scanners, scales, displays and printing options.

PRODUCT MANAGEMENT

A full featured item maintenance program based on the SIL data dictionary. Multiple vendors per item, multiple price levels per item, effective screen layouts, extended filter criteria, powerful global changes and real-time data analysis.

CUSTOMER MANAGEMENT

The SMS customer database provides flexibility for multiple management purposes such as accounts receivable, check validation and loyalty programs.

- **ACCOUNTS RECEIVABLE**
Accurate management of your accounts receivable: maximum credit, account statement in "Open Balance" or "Invoice Matching" mode, age of accounts, open payment, full or partial payment of invoices, debit notes, etc.
- **CUSTOMER LOYALTY MODULE**
SMS integrates the advanced preferred shopper options to manage customer benefits: discounts, electronic coupons, points accumulation, special price, etc. All customer benefits are programmable by shopper level (bronze, gold, platinum, etc).

INVENTORY MANAGEMENT / RECEIVING

A reliable inventory control system: physical count and adjustment of inventory, multiple counts (multiple locations) for the same product, automatic inventory update. Also SMS allows you to manage receiving and cost of goods. Goods receiving can be done through a wireless handheld device or directly from your computer.

BALANCING AND ACCOUNTING

The Balancing module is a tool to manage pickups, loans and declare for each cashier. It supports safe management: deposits, withdrawals and declaration. You can also enter all your accounting entries like paid in and paid out.

SYSTEMS YOU CAN TRUST...
SUPPORT YOU CAN RELY ON...

ELECTRONIC JOURNAL

The SMS Electronic Journal is available in XML format so you can search, report and export information easily. Multiple reports and advanced searching options are also available.

NATIVE LABEL PRINTING

The Label Printing program has been designed to fit with retail industry requirements: printing labels from internal or external batches, bulk printing, unlimited label formats.

FLEXIBLE REPORT GENERATOR

SMS uses a report builder generator. The SMS system currently contains over 500 reports for sales analysis. You can also create your own reports.

POWERFUL RENTING FEATURE

You can now use SMS to control the rental of your video, games, tools, cleaning machine, etc.

IMPORT / EXPORT

The SMS database has been designed in conformity with the Standard Interchange Language (SIL) in order to provide flexible import and export utilities: ASCII or DBASE format converted to SIL standard file, map file to extract information from source file, deli scale interface.

AND MUCH MORE...

PURCHASE ORDER / ALLOWANCE

An integrated tool for purchase order entry, PO/delivery slip comparison and vendor bill control. Orders can be based on history or minimum/maximum, and transactions can be exported to accounts payable software.

KIOSK AND PRICE CHECKER

Our kiosk module can be used for price verification, customer points, balances or promotions. Interface to price checker devices. Windows/PC web kiosk with support for scanner and printer.

WIRELESS HANDHELD

With the wireless handheld, SMS functions are now virtually accessible anywhere, anytime. Our portable unit allows you to verify or change a price, receive stock, update information, enter orders, and even print labels.

E-COMMERCE

Open your doors online. Our SMS E-commerce module provides retailers with an access to this virtual market place. Orders from the internet are directly sent to your computer; no more interface between two systems.

TIME & ATTENDANCE

This full featured time management tool lets you create and maintain your employees schedules efficiently.

ELECTRONIC ADVERTISING

66% of purchase decisions are made in store; a good reason to put more time, attention and strategic design into your store advertising.

SCALE INTERFACE

Interface your SMS database to all your department scales. We can now deploy changes to your register and your scales at the same time.

GAS PUMP INTERFACE

Our gas pump interface is compliant with the major pump suppliers. Integrated pump control with the POS system along with sales report for gas, store operations and gas inventory control.

DIGITAL VIDEO RECORDER INTERFACE

Review the transaction live from your back office. A very powerful tool for lost prevention.

WAREHOUSE

This module provides ordering and shipping functions to ensure accurate and efficient management of your orders. Also supports inventory commitment, shipment handling and fees.
