Powerful Systems Tailored to Co-op Needs

Nothing is more important to a food Co-op than its members' happiness. When a growing Co-op in Ithaca, NY came to STCR looking for the right POS tools, we thoroughly assessed the store's needs and implemented IBM's SurePOS System to help the Co-op improve sales reporting, category management, member discount program and check-out efficiency.

The flexibility of our POS systems provides peace of mind for food cooperatives, knowing that the system you invest in today will be the system that helps you grow into the future. Whether it's adding features, functions, registers or stores... it grows with your needs.

STCR's IBM SurePOS system is fast, reliable, efficient and customizable, operating on the secure IBM platform. It also offers superior data handling capabilities such as a home delivery program, integrated debit/credit, managing member discounts, importing weekly price updates from UNFI and other warehouses with CAP file imports, as well as integration with Living Naturally's Scan Genius and Loyalty Genius.

Our Support Desk of experts at our National Headquarters is ready 24 hours a day, 365 days a year to provide the top shelf customer service that has helped STCR's clients thrive for more than 40 years.

POS features easy-to-use touch screen design, programmable flip charts, multi-level security features and an electronic journal.

Complete management for product, price, membership and reporting.

STCR's unmatched support team is available any time of the day or night to keep your store running smoothly.

A Truly Integrated System for Co-op Food Stores

Features

Benefits

Point of Sale/Fast Check-Out	Creates ease of use, minimizes training and increases customer throughput while providing quality, flexibility, reliability and security.
Touch Screen/Keyboard	Choice of touch screen or keyboard for flexibility and ease of use.
Integrated Debit/Credit	Provides fast, accurate debit/credit transactions with numerous processors.
Membership Tracking, Patronage Refunds and Discounts	Keep track of members' purchases and hours worked to provide accurate discounts and rebates.
Equity Payment at POS	Track and control membership payments as well as take membership payments at the POS.
Accurate and Flexible Reporting	Flexible, comprehensive and accurate reporting to better make your business decisions.
Integration with Accounting	Information will integrate from the POS to accounting to increase accuracy and reduce labor costs.
Hand-Held Terminals	To help manage inventory and direct store delivery (DSD) while reducing labor cost and increasing efficiencies.
Integration with Vendors	Import weekly price updates from UNFI and other warehouses with CAP file imports, as well as integrate with Living Naturally's Scan Genius and Loyalty Genius.
Integrated Shelf Label and Sign Printing	Print your CAP signs directly from your system.
Import - Export Flexibility	Expands the capabilities of the system to integrate with other systems so looking at your data can be done when you want, where you want and how you want.
